PROJECTS

FJ8 Reldev: Cloud-Based Document Tracking and Workflow Automation System

— PHP, Laravel, MySQL, JavaScript, REST APIs, HTML5, CSS3, Webhooks, and Bootstrap

- Designed and developed a cloud-based document tracking system to automate real estate file routing, status tracking, and approval workflows.
- Implemented role-based access control (RBAC) to manage multi-tier permissions and secure sensitive client transaction records, land titles, and legal deeds.
- Integrated automated real-time email and SMS notification triggers to alert stakeholders of pending reviews, approval milestones, and processing delays.
- Built a centralized digital repository with dynamic multi-parameter search capabilities for instant retrieval of property files and transaction histories.
- Integrated MySQL for backend database management to store active document metadata and generate time-stamped audit logs for compliance tracking.
